

Safety and Comfort

EHA-ManuPlast Floor Gratings:
clean, safe and extremely comfortable

ManuPlast Floor Gratings from EHA

Making barefoot walking safe

Safety first+

The tread is provided with a safety pattern that makes walking and standing safe and comfortable. Water or other liquids can run off so there is no danger of slipping.

Quality through and through

ManuPlast floor gratings from EHA are unbreakable, corrosion-proof and resistant to chemicals, acids and caustic solutions in commercial concentrations. That makes them long-lasting, robust and economic.

Perfect hygiene

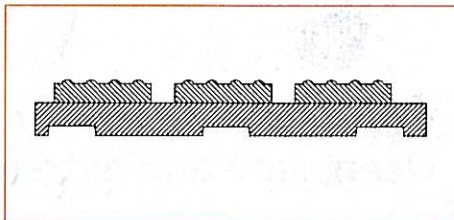

ManuPlast floor gratings are ideal for bare-foot areas, such as shower rooms, wash-rooms, bathrooms, changing rooms or saunas. They are resistant changing to fungi and bacteria.

Clean in no time

Cleaning ManuPlast floor gratings is as easy as ABC. The gratings are unaffected by commercial cleaning agent; they can be hosed down, scrubbed or cleaned with a high-pressure cleaner.

The underside is provided with recesses at regular intervals, so that liquids can run off on all sides. Liquids are not trapped inside the gratings, and germs cannot find a breeding ground.

Easy to lay

ManuPlast floor gratings can be rolled up and are therefore easy to lay and remove again. Just a few quick movements - and you have a walking surface in any desired location that offers perfect safety and comfort.

Technical Data:

Article No.: 88
Top surface: Hard PVC with a nonslip pattern
Back surface: Soft PVC (trapeze-shaped) with drainage facilities
Tread pattern: 4 x 29.5 mm
Back patterns: 7x11/10 mm
Colours: blue, grey, white, red, yellow (other colours upon request)
Overall height: 12 mm
Weight: approx. 5,4 kg/sqm
Gap width: 8 mm
Temperature resistance: -5°C to + 60°C
Available widths: up to 100 cm
Available lengths: up to 20 m
